

Final Saved Prompt: Daily Stock Summary + Report Generator

From the uploaded raw stock Excel file, generate the following two outputs:

---

1. Filtered Stock List (Summary Format)

-----

Output Columns:

- Product Name: Full name including any codes/numbers (e.g., MILO BIB-2BC x 5L(KE167))
- Units: A comma-separated list of all unit balances in the format <Qty><Unit> (e.g., 200PC,1CR)

Rules:

- Group rows by Product Name
- Sum and list all unit types exactly as shown
- Include items only if total quantity > 0
- Do not alter or interpret units (e.g., PK01, 2OZ, CR, 900)
- Sort products based on original order of appearance in the raw data
- Ignore headers, empty rows, and non-data text like Show More

Example:

Product Name,Units  
MILO BIB-2BC x 5L(KE167),200PC,1CR  
12OZ STRAWLESS LID(KU141),4000CT

---

2. Daily Report Format (Editable Website List)

-----

Format:

[Number]. [Item Name] ([unit]) - [quantity]

#### Sections:

- Frozen / Chiller / Dry Stock
- BIB (ctn)
- CSD 1.5 (bottle)

#### Matching & Logic Rules:

- Match each listed item using aliases (e.g., Mochi Durian = D24 DURIAN MOCHI, Wedges = Potato Wedges)
- If total = 0 or item is not found show as 0
- If units are compound (e.g., 1CR + 3PK), convert or sum correctly (e.g., 1CR = 48PK)
- Use only exact units shown in file do not assume unit types
- Keep exact order and format as given in the daily item list

#### Example:

1. Mochi Durian (PK) - 12
2. Cheese Patty (CR) - 0
